

IEEE 39-bus simulation evidence map

Topology overlay

Simulation evidence

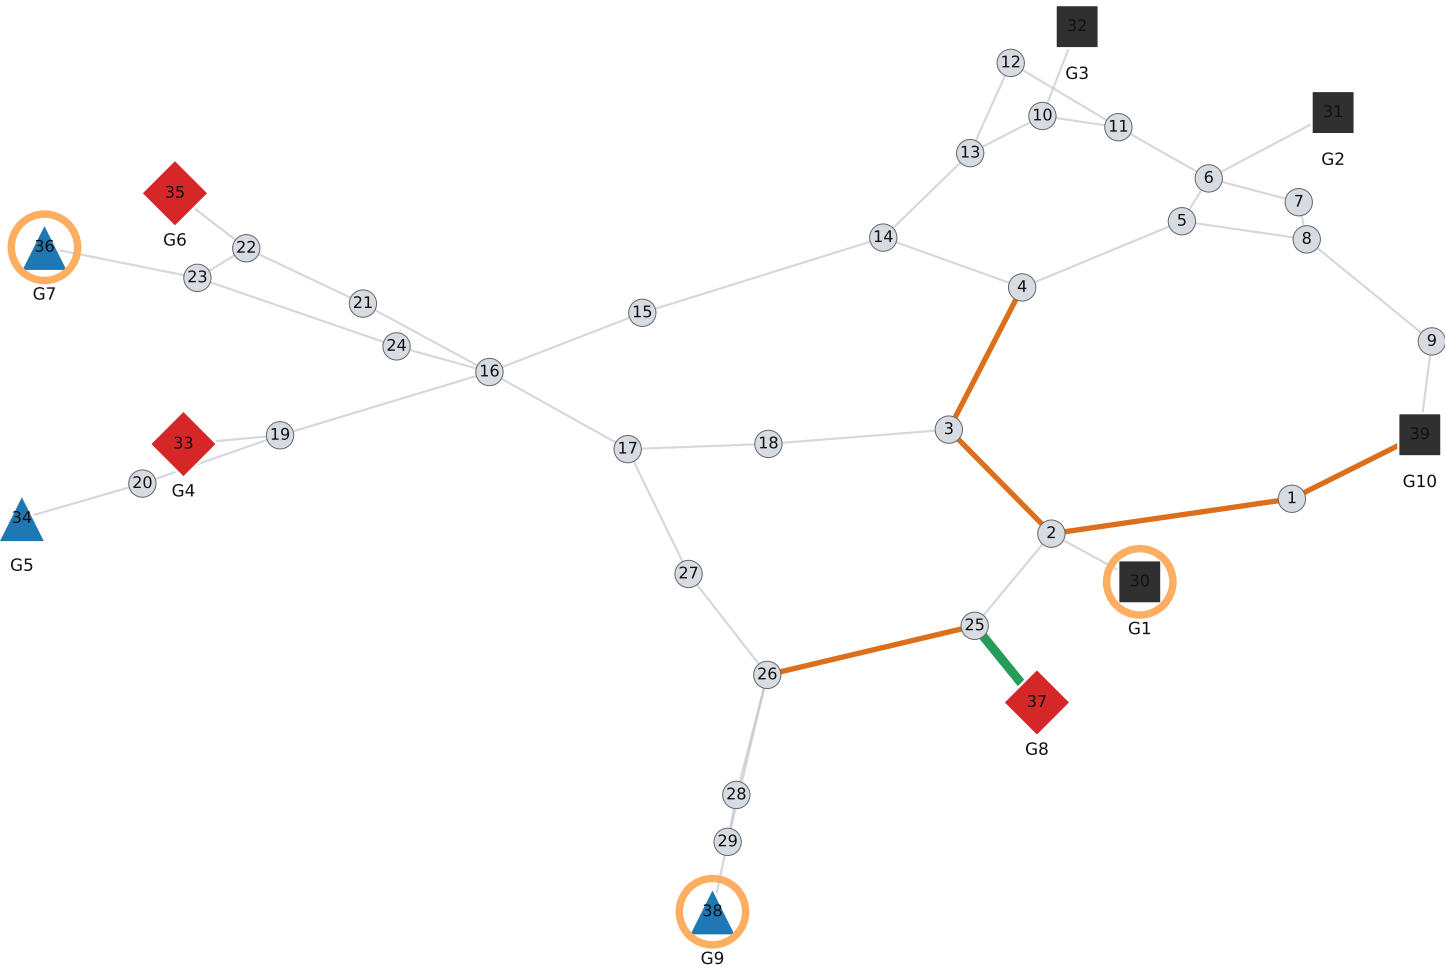

C2 estimator:
diag median 0.468%
2nd-order median 0.032%
rQEP p95 5.44%

Weak nodes:
best bus 30
top ring = damping placement

Weak links:
best line 25-37
Delta zeta = 0.0063

Braess-like reversals:
35/46 lines
orange = strongest negative

ANDES Phase-1:
50 case/profile EIG audits
full estimator gate still blocked

- Braess-like reversal
- best damping link
- top weak node ring
- GFM replacement
- GFL replacement
- SG retained
